

We claim:

1. A medical treatment device comprising:
  - a main crystal having a base portion and an emitting tip portion;
  - 5 means for generating a resonating frequency in the main crystal which is focused by the emitting tip portion of the crystal toward an effected body part for treatment for up to approximately 2(two) minutes; and
  - a power supply for supplying power to the generating means.
- 10 2. The device of claim 1, wherein the main crystal includes:
  - multi-faces.
  3. The device of claim 2, wherein the multi-faces includes: approximately six or more faces.
- 15 4. The device of claim 1, further comprising:
  - side crystals attached to the main crystal.
5. The device of claim 1, further comprising:
  - 20 a handheld grip for positioning the device up to approximately 18 inches above the effected body part being treated..
6. The device of claim 1, further comprising:
  - 25 a floor supported stand for supporting the device up to approximately 18 inches above the effected body part being treated.

7. The device of claim 1, wherein the generating means includes: an electromagnetic driver.

8. The device of claim 1, wherein the resonating frequency includes: a fixed  
5 frequency of approximately 7 to approximately 8 Hertz.

9. The device of claim 1, wherein the generating means includes: a flash lamp source.

10 10. The device of claim 1, wherein the resonating frequency includes: a variable range of approximately 4 Hertz to approximately 15 Hertz.

11. The device of claim 1, wherein the power supply includes: a 120 Volt AC power supply.

15 12. The device of claim 1, wherein the power supply includes: a battery power supply.

13. The device of claim 1, further comprising:  
means for alternating between a fixed resonating frequency, and a variable  
20 resonating frequency.

14. The device of claim 1, further comprising:  
a lens for diffusing and amplifying signals from the emitting tip portion of the  
main crystal.

25 15. The device of claim 15, wherein the lens includes: a crystal sphere.

16. The device of claim 1, further comprising:  
means for forming a beam from the emitting tip portion having a diameter of  
approximately 5cm to approximately 6cm.

5 17. A method of treating effected body parts with a pulse emitting tool, comprising  
the steps of:  
supplying power to a generator;  
generating an input signal from the generator into a crystal body;  
emitting pulses having a selected resonating frequency signal from the crystal  
10 body toward a body part for treatment; and  
running the pulse emitting tool up to approximately 2 minutes to achieve healing  
effects.

18. The method of claim 17, further comprising the step of:  
15 positioning the device up to approximately 18 inches above the body part for  
treatment.

19. The method of claim 17, wherein the resonating frequency includes the step of:  
emitting a resonating frequency of approximately 7 to approximately 8 Hertz.  
20

20. The method of claim 17, wherein the resonating frequency includes the step of:  
emitting a variable frequency of approximately 4 to approximately 15 Hertz.

21. The method of claim 17, further including the step of:  
25 alternating between a fixed resonating frequency, and a variable resonating  
frequency.

22. The method of claim 17, further comprising the step of:  
supporting the device by a handheld grip.
23. The method of claim 17, further comprising the step of:  
5 supporting the device by a floor based stand.
24. The method of claim 17, wherein the receiving step includes:  
receiving ambient energy through side crystals pre-attached to side faces of the  
main crystal body.

10

25. The method of claim 17, further comprising the step of:  
amplifying and diffusing the pulses being emitted from the main body.
